

## Redefining the Global Workplace

At the Evelo Agency, our processes produce measurable results that minimize the risk of implementing a flexible workspace concept.

# The Evelo App

**We have designed a tool that immediately identifies personalized, flexible work space needs!**

- We all have unique work space needs, based on our own, individual personalities. The Evelo App is an engaging way to easily identify your exact work space preferences.
- This App defines 10 types of flexible work environments and aligns you with the models that best suit your needs. Using the App will allow you to understand and engage with work environments that support you!
- If you manage or own a flexible workspace, this is a great way to poll your members, to be sure your space(s) suit their needs!

**Our App is an easy way to identify the Flexible Workspace models that best fit your personality!**
